SAKSHI IPPE

Data Analyst | Python & SQL | Data Engineering | Gen AI

Pune, Maharashtra | sakshiippe05@gmail.com | +91 9356784051 | Portfolio | LinkedIn | GitHub

Summary

Data analyst and AI engineer who turns raw data into business insight. Skilled in building Python and SQL pipelines (ETL, data cleansing, CTEs, window functions) and Power BI dashboards that track key business KPIs, plus Generative AI solutions such as RAG systems and LangGraph agents that automate analysis and reporting. OCI Generative AI Professional certified, eager to deliver end-to-end analytics solutions.

Technical Skills

Data Analytics & Engineering: Python (Pandas, NumPy), ETL pipelines, data cleansing & normalization, data pre-processing, data modeling, event-driven pipelines, process automation, ad-hoc reporting

SQL & Databases: SQL (joins, views, CTEs, window functions, performance tuning), PostgreSQL

Data Visualization: Power BI (interactive dashboards, KPI reporting)

AI / Gen AI: LLM integration (Groq, Llama-3), RAG, agentic workflows (LangGraph, LangChain), vector search (ChromaDB, Qdrant), prompt engineering, NLP (spaCy, NLTK), Scikit-Learn

Languages & Tools: Python, SQL, Java, FastAPI, REST APIs, React.js, Next.js, Docker, Git, Postman

Computer Fundamentals: DSA, OOP, DBMS concepts

Projects

Sales & Customer Analytics Pipeline (Olist E-Commerce) *Python, Pandas, PostgreSQL, SQL, Power BI*
GitHub

- Built a Python ETL pipeline (Pandas) to clean, normalize, and load 100K+ orders into PostgreSQL; wrote SQL views using joins, CTEs, and window functions for revenue and customer KPIs.
- Performed RFM segmentation and cohort retention analysis in Python to identify high-value and at-risk customers; top segment drove of revenue.
- Built an interactive Power BI dashboard by product category and region.

AI-Powered Personal Health Navigator – Full-Stack RAG Platform *FastAPI, LangGraph, ChromaDB, Groq LLM, PostgreSQL*
GitHub

- Built a RAG pipeline indexing multi-document datasets with sentence-transformer embeddings in ChromaDB for semantic search and context retrieval.
- Designed a multi-node agentic workflow with **LangGraph** to orchestrate LLM calls (Groq/Llama-3), returning structured outputs via REST API.
- Deployed as a multi-service system: FastAPI and PostgreSQL on Railway, Next.js frontend on Vercel.

BloomEd – Full-Stack Adaptive Learning Platform *Next.js, FastAPI, PostgreSQL, Groq LLM, Qdrant, Docker*
GitHub | Live Demo

- Built an LLM-driven pipeline that generates and scores questions dynamically from user performance data, mapped to Bloom's Taxonomy.
- Designed real-time state sync across a multiplayer FastAPI WebSocket system, with PostgreSQL persistence via Drizzle ORM.

Work Experience

Vulnuris Security Solutions *Apr 2025 – Jun 2025*
Jr. Product Developer *Pune, India*

- Automated email scheduling by building an event-driven data pipeline with **Apache Pulsar** and **PostgreSQL**, improving delivery reliability by 35%.
- Migrated 15+ components from **JavaScript** to **TypeScript** and integrated **Zustand**, improving application performance by 40%.
- Built and refined React.js components for Vaultix, a security dashboard product.

Education

PVGCOET, Pune University **2022 – 2026**
B.E. in Electronics & Telecommunication (CGPA: 7.91) – degree completed *Pune, India*

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | Fundamentals of Deep Learning – NVIDIA

Achievements

- **Runner-Up**, BV TechFusion 2026 (National Level Project Competition) – 2nd among 130+ teams (May 2026).
- **SIH 2024** – Built a carbon emission tracking web app; cleared institutional selection round.
